

Iceland - 4 days

Iceland boasts some of the great natural wonders of the world: active volcanoes, glaciers, black sand beaches, geysers and hot springs. Winter is a beautiful time of year to visit with the chance to see the amazing Aurora Borealis in the night sky. Your stay begins at the Blue Lagoon, a celebrated geothermal pool in a wonderful setting of black volcanic rocks, a perfect introduction to the country. The Hotel Ranga is an ideal location to see the Northern Lights. We'll tour the south coast of Iceland including the famous Eyjafjallajökull volcano and the waterfalls of Seljalandsfoss and Skogafoss and the Golden Circle where the volcanic crater lake of Kerith and the spouting hot springs of Geysir and Strokkur are found.

Day 1

Arrive Keflavik Airport and transfer to the Blue Lagoon. This celebrated geothermal pool in a wonderful setting of black volcanic rocks is the perfect introduction to Iceland. Relax and get something to eat before continuing your journey to Hotel Ranga in the south of the country.

Day 2

Tour the south coast of Iceland today including a look at the famous Eyjafjallajökull volcano, and the precipitous waterfalls of Seljalandsfoss and Skogafoss, both with 60 metre drops. There is time to explore the glacier at Solheimajökull and Reynishverfi beach with its geometrically deposited basalt rocks and the great promontory of Dyrholaey with its gigantic black arch of lava. Overnight Hotel Ranga.

Day 3

Golden Circle excursion to the volcanic crater lake of Kerith and the broad cataracts of Gulfoss waterfall. You will see the spouting hot spring Geysir - from which our word geyser is derived - and nearby Strokkur, sometimes up to 40 metres high. Also visit the site of Thingvellir, where the land is marked by mighty fissures in the earth. Continue to Iceland's capital city of Reykjavik for the night.

Day 4

Morning sightseeing tour of Reykjavik. Coach transfer to Keflavik Airport.
